Amare Group SRL are specialized in the production of marine glazing systems, portholes, gangways and hydraulic lifting systems using advance processing techniques to combine glass, stainless steel, aluminium and teak into beautiful products for the luxury marine industry.

Amare Group stands out for its vocation to correct the details that competitors overlook, through functionality and beauty. This is what we call innovation.

Our products are of the highest quality thanks to the enhancement of modern design and attention to safety and fully reflect what 'Made in Italy' is famous for.

INFINITY PORTHOLE

Direct Bonded on glass

Designed in Italy
Handmade by Artisans
High quality finish
2.3 Bar pressure resistance
CE - Pleasure - MCA Certified
Friction hinge
Adjustable handles
Flush curved surfaces
AISI 316L
DOMOTIC monitoring by [ASW](#)

NG LINE PORTHOLE

fixed on fiberglass.

Designed in Italy
Made in Italy
High quality finish
0,75 Bar pressure resistance
CE - Pleasure - MCA Certified
Friction hinge
Adjustable handles
AISI 316L
DOMOTIC monitoring by [ASW](#)

CLASSIC PORTHOLE

welded on the hull - SY division.

Designed in Italy
Hand Made in Italy
High quality finish
MCA Certified
AISI 316L
DOMOTIC check by [ASW](#)

VANITY

hi-tech and modern.

Designed in Italy - Modena
Made in Italy by skilled Artisans
High quality finish
Teak panels
MCA watertight front-box
Full width access
Security coded access
Easy maintenance
DOMOTIC monitoring by [ASW](#)

VANITY

hi-tech and fashion.

External level regulation
Patented easy wedge UP-DOWN
Reduced deflection
Remote diagnostics

5 star
CUSTOMER RAITING

CHARON

hi-tech lift.

Designed in Italy

Made in Italy

Unbalanced load compensation

Single cylinder

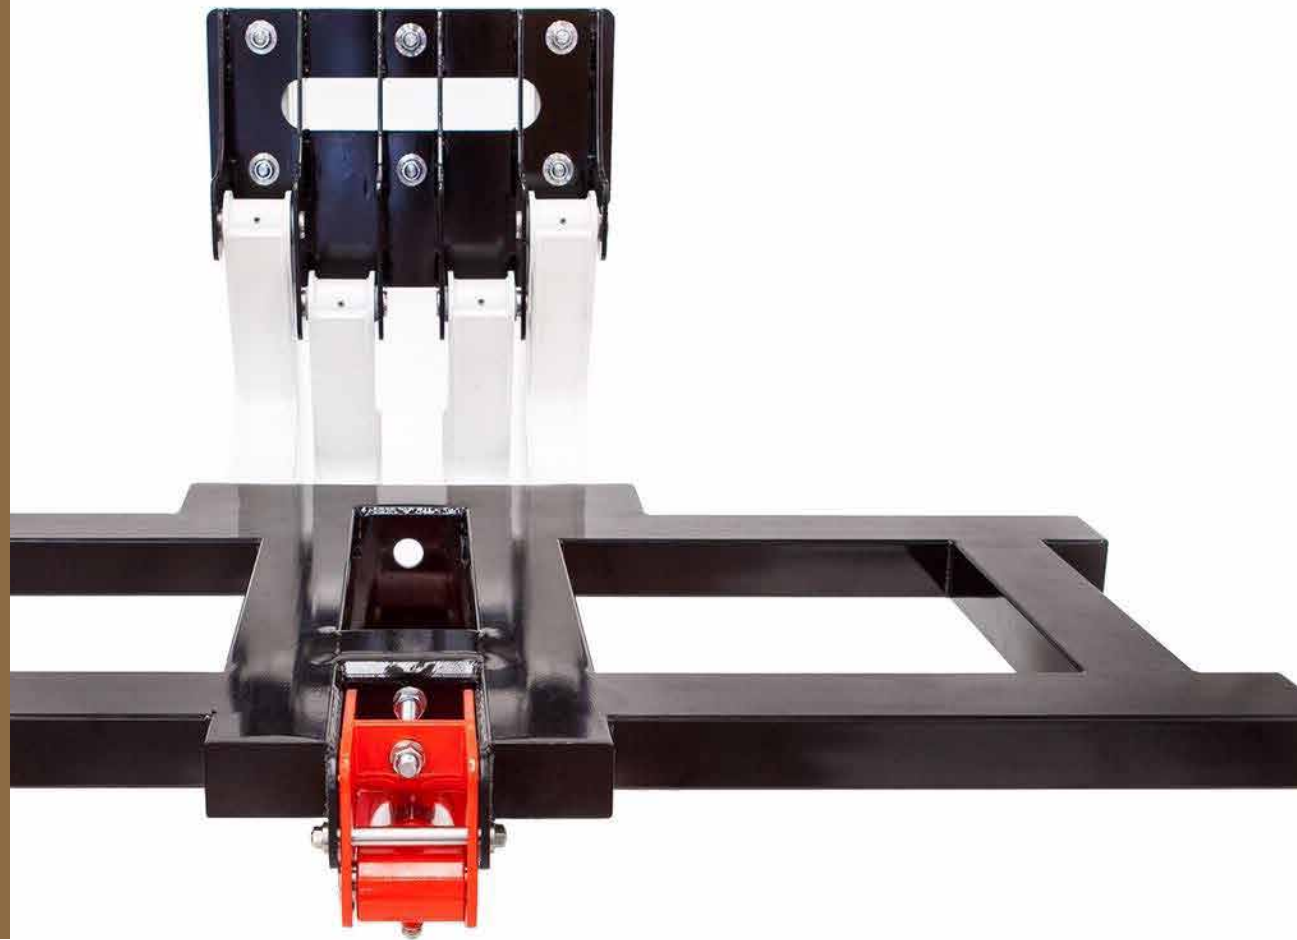

Easy maintenance

Easy installation

Safety locking

6 lt high load hydraulic pack

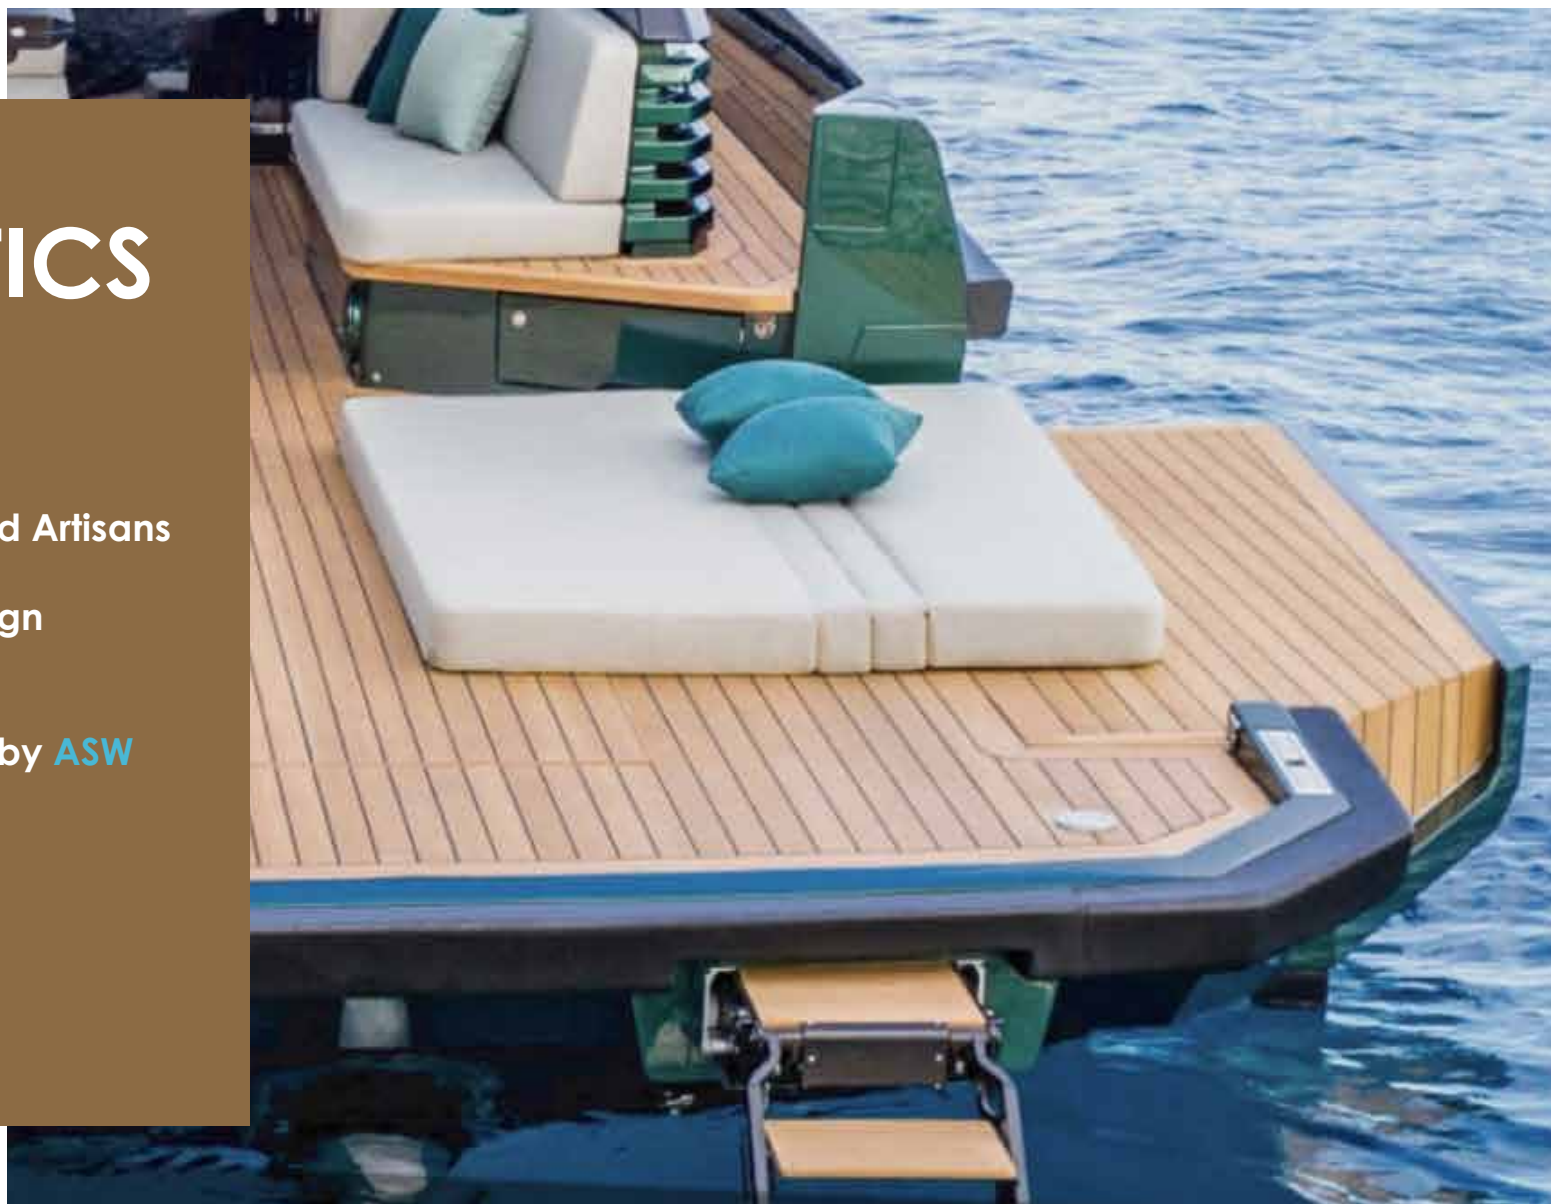

Plug in control

KINEMATICS

hydraulic projects.

Designed in Italy
Made in Italy by skilled Artisans
High quality finish
Hydraulic system design
Remote control
Easy maintenance
DOMOTIC monitoring by [ASW](#)

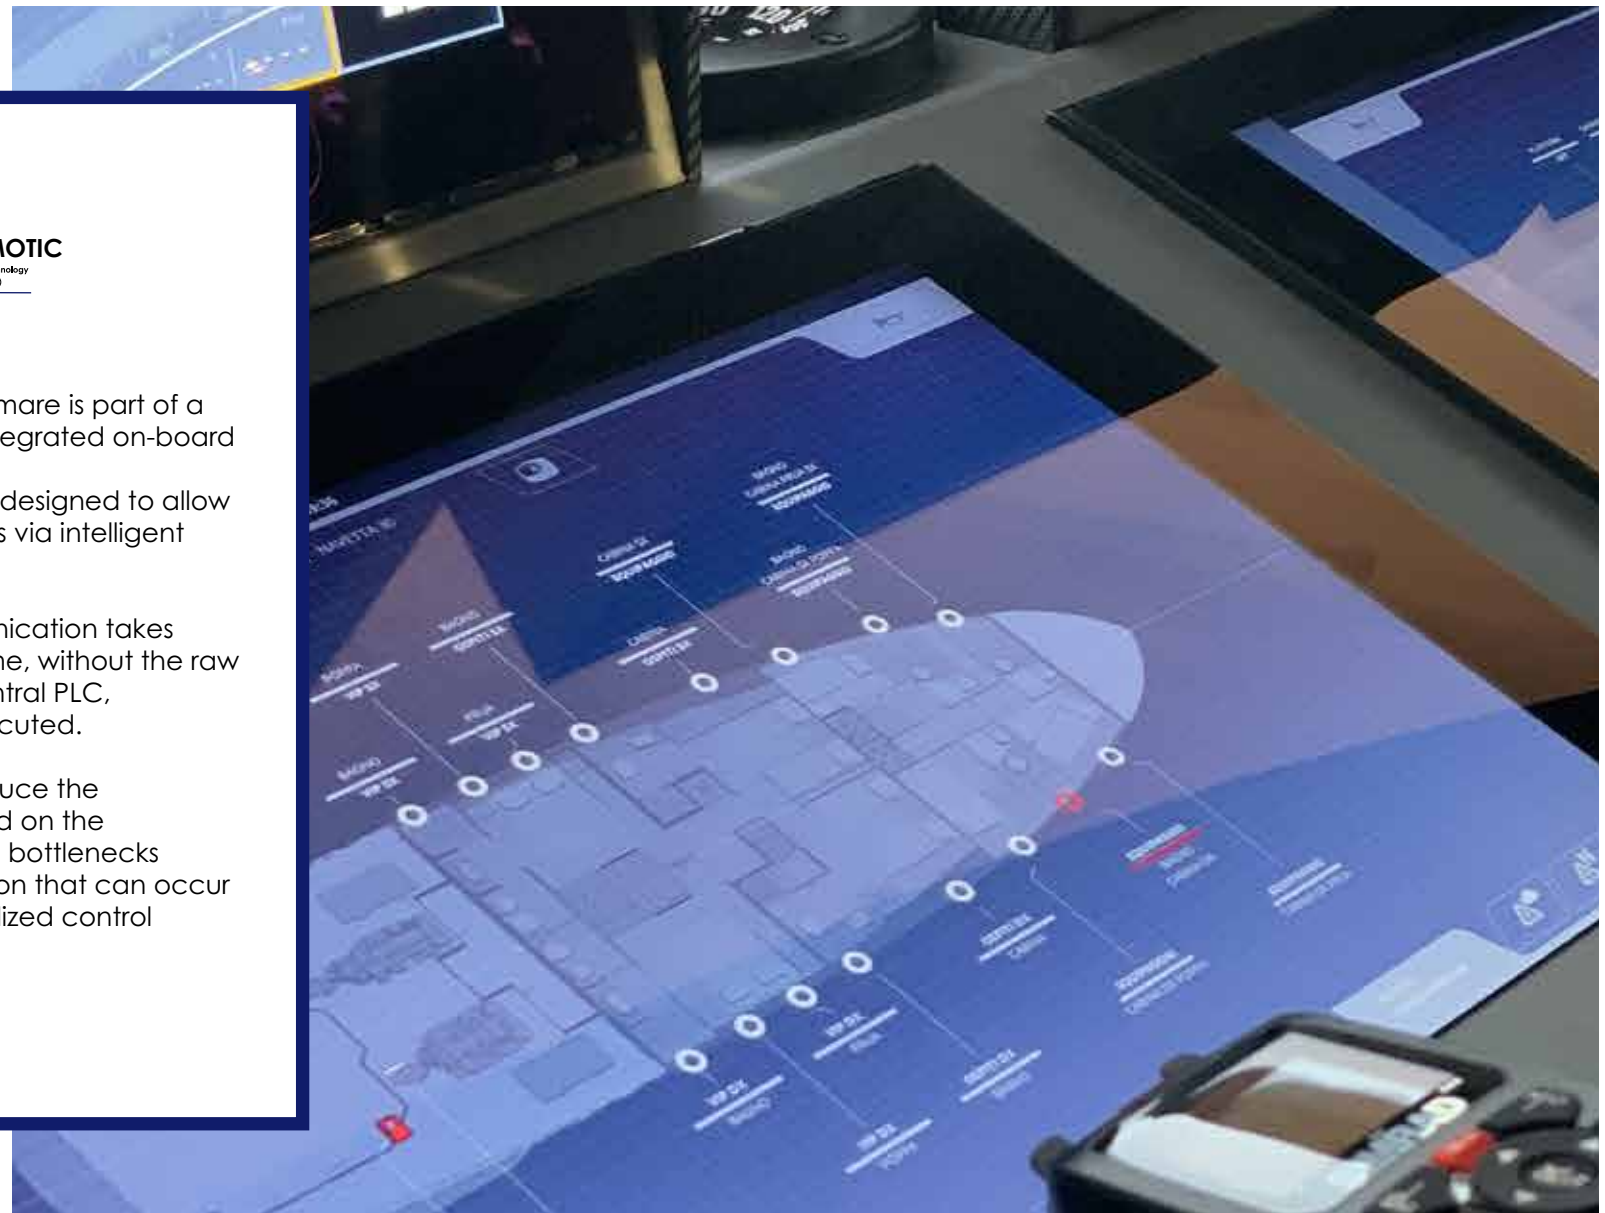

The ASW SENSOR from Amare is part of a wider concept of an “integrated on-board network”.

Our ‘Wireless Network’ is designed to allow multiple communications via intelligent monitoring sensors.

The “intelligent” communication takes place locally, in real time, without the raw data being sent to a central PLC, processed and then executed.

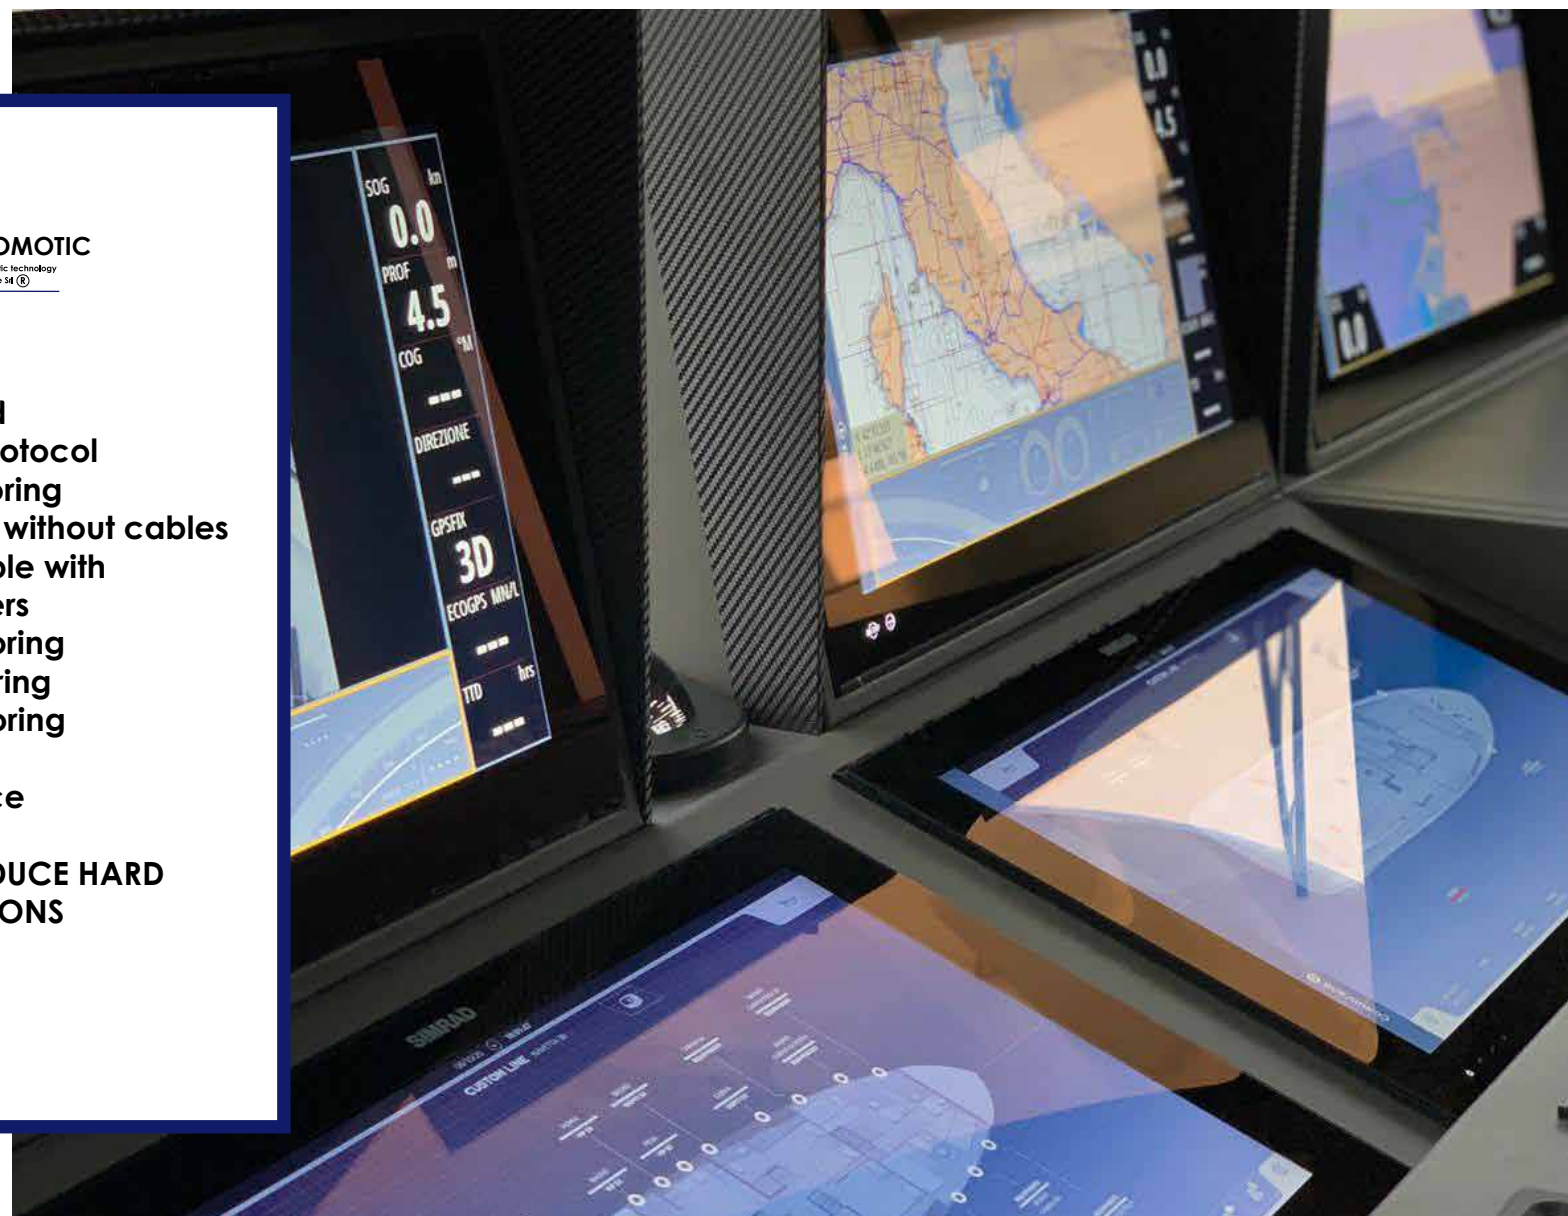

“ASW Smart Sensors” reduce the raw data processing load on the controllers, thus avoiding bottlenecks and slow data transmission that can occur through a typical centralized control hierarchy.

No wires required
Amare private protocol
Hardware monitoring
On-Off switching without cables
System compatible with
NAVIOP and others
Gangway monitoring
Portholes monitoring
Tank level monitoring
Fast installation
Easy maintenance
